Disclaimer

Precious metal markets are volatile. Investments in precious metals involve a high degree of risk and are not suitable for all persons. Losses may be incurred both as a result of price diminution and if any price gains do not exceed applicable management, handling, delivery and related fees. Gold Corporation has not offered or given and will not provide any investment advice in connection with this PIS or PMCP. If you are in any doubt as to the suitability of precious metals as an investment you should contact your legal and financial adviser before investing in PMCP.

1 ABOUT THE PERTH MINT

The Perth Mint Certificate Program (PMCP) is operated by Gold Corporation, who is the successor organisation of the Perth branch of Britain's Royal Mint, founded in 1899. Gold Corporation was established by the *Gold Corporation Act 1987* on 30 June 1988 to take over the operations of the Mint. It is now wholly owned by the Government of Western Australia and trades under the name "The Perth Mint".

Perth Mint's Operations

The Perth Mint is an integrated precious metals refiner, fabricator and secure depository supplying precious metal related products and services, including:

- Refining some 400t of gold per annum from the Australasian region;
- Value added cast bars, minted bars and Australian legal tender bullion coins which promote the ownership of precious metals;
- Precious metal depository products which offer precious metal storage services to domestic and international private clients, trusts, superannuation and pension funds, and corporations seeking secure storage under government guarantee;
- Proof, numismatic and commemorative coins which are legal tender of Australia and other countries;
- Storage and safekeeping of precious metals, and
- Coin blanks and other precious metal products.

It also operates a tourist attraction based on the themes of gold, coins and their history, and offers assaying and other services to the gold industry.

Government Guarantee and Prudential Requirements

The Board of Directors is the governing body of The Perth Mint. The *Gold Corporation Act 1987* empowers the Board to determine policies for the Mint and its subsidiaries, and requires the Board to:

- a. develop and expand the Mint's business for the benefit and to the greatest advantage of the people of Australia;
- b. operate in accordance with prudent commercial principles; and
- c. strive to earn a commercial rate of return on its capital.

The Board's authority is limited by the provisions in the *Gold Corporation Act 1987* and by Ministerial direction. The Board is committed to sound corporate governance principles, high standards of legislative compliance, and financial and ethical behaviour. The Board regards directorial and managerial conduct seriously and sees it as an integral part of sound governance practices. In accordance with that, the Board has established and committed itself to a Statement of Business Principles and a Corporate Governance Charter. The Board acknowledges its accountability to the Mint's only shareholder, the Government of Western Australia. The Perth Mint's Board of Directors includes a delegate of the Under Treasurer of the State of Western Australia.

The obligations and liabilities of the Mint, including all precious metal held by the Perth Mint Depository in Allocated, Pool Allocated and Unallocated storage accounts, is guaranteed by the Government of Western Australia under Section 22(1) of the *Gold Corporation Act 1987*. Western Australia is one of Australia's wealthiest states, and enjoys a Standard & Poor's AAA credit rating.

The Mint is bound by strict prudential management requirements and policies, and is required to comply with the *Financial Management Act 2006*. The Mint is subject to a rigorous internal audit program conducted by a large independent firm of auditors, and to a detailed annual audit conducted by the Office of the Auditor General of the State of Western Australia to ensure compliance with the *Gold Corporation Act 1987*, the *Financial Management Act 2006* and applicable accounting standards. The audits include a full verification of precious metal holdings.

The Perth Mint is not a bullion bank and does not provide project financing or bullion lending/derivative services to mining companies or other entities. It does not lend client's metal to support short selling transactions or other derivative activities. All deposits are fully backed by precious metals holdings.

Under the Perth Mint Certificate Program Agreement, the Mint has an obligation to ensure client precious metal is available for collection within a specific period from the date of receiving a client's instructions.

Under Section 74 of the *Gold Corporation Act 1987* it is an offence for any employee of the Mint to divulge to any person, any information concerning the business affairs of a client of The Perth Mint.

2 THE PERTH MINT CERTIFICATE PROGRAM

The Perth Mint Certificate Program (PMCP) offers investors a unique range of precious metal storage facilities on internationally competitive terms.

The program is sold through a network of independent Approved Dealers around the globe. Each Approved Dealer is one of a select few appointed by The Perth Mint Depository Services. Please refer to the Contact information in this PIS for a list of Approved Dealers.

The PMCP issues Certificates, detailing your metal holding, in your name and identified by a Certificate number. The PMCP is also the only Government Guaranteed certificate program in the world, making it one of the safest ways to own precious metals. Its administration is not unnecessarily burdensome and complies with Australia's Anti Money Laundering and Counter-Terrorism Financing legislation.

PMCP clients have legal title to precious metals stored in either an **Allocated**, **Pool Allocated** or **Unallocated** accounts. The PMCP facilities are especially suitable for private investors seeking confidentiality and flexibility and a safe haven for their precious metal assets in an uncertain world.

PMCP offers clients the following comprehensive services:

- Precious metal storage on an **Allocated**, **Pool Allocated** or **Unallocated** basis. The availability of the storage type is at the sole discretion of the Mint.
- Purchase and sale of precious metal holdings at internationally competitive prices. Two day settlement of sale proceeds.
- Execution of standing and stop loss orders.
- Arrangement of precious metal transport, insurance, and release from safe custody.
- Provision of transaction or holding statements on request.
- Conversion of **Unallocated and Pool Allocated metal** to **Allocated Coins or Bullion** upon payment of the current fabrication charges.

Account opening minimums apply to PMCP, which are detailed in a separate Fee and Product Information Schedule. The Schedule also details coins and bars available in PMCP and storage fee rates. Approved Dealers charge clients transaction Entry and Exit Fees directly and these will vary between Approved Dealers.

There are currently and generally no Australian taxes or duties on the import or export of The Perth Mint's bullion bars or coins into or out of Australia. The Perth Mint's bullion bars or coins also currently do not attract Australian Goods and Services Tax (equivalent terminology in other countries would be "sales tax" or "VAT"). Local sales tax may apply and your Approved Dealer can confirm if this is the case.

The Perth Mint is currently not required to apply any withholding taxes on capital gains made on precious metals held with it. However, clients are advised to consult their own taxation professional in regards to the taxation and jurisdictional implications and issues (if any) of investing in precious metals in the PMCP.

Account Opening Minimum: \$10,000.00 USD

Certificate Fee: \$50.00 (USD for International, AUD for Australia / New Zealand)

Transaction Fees: Please contact your selected Approved Dealer

Transaction minimum for all buys and sells: \$5k

3 RISKS OF INVESTING IN PMCP

Investing in PMCP involves a degree of risk. This section is a general summary of some of these risks.

This section does not purport to be a comprehensive summary of all of the risks associated with an investment in PMCP but describes the significant risks associated with an investment in a PMCP. Further, by its nature, this section cannot identify all of the relevant considerations that may be a risk for individual potential investors, and is not a substitute for independent advice.

PMCP is considered by The Perth Mint to be suitable only for investors who understand fully and accept all of the following risks involved in investing in this product. This PIS does not take into account a potential investor's own financial needs, investment goals or financial circumstances. The Perth Mint recommends that you obtain independent financial advice before buying precious metals.

General Market Risks

The general economic and political climate, general movements in local and international stock markets, prevailing and future economic conditions, investor sentiment, interest rates, and other events and factors outside the control of The Perth Mint could all affect the value of your precious metal.

Market prices for precious metals can increase as well as decrease. The market value of your precious metals will be determined by market conditions, including:

- (a) The volatility of the over-the-counter precious metal and foreign exchange markets; and
- (b) The liquidity of the over-the-counter precious metal and foreign exchange markets.

Changing market conditions may cause a change in precious metal prices.

Precious Metal Price and Exchange Rate Risks

Precious metals are generally traded internationally in US dollars (USD). For investors in other countries the value of an investment in precious metals in their local currency will be affected by movements both in their local currency's exchange rate with the US dollar and US dollar precious metal prices. Increases in local currency precious metal prices may arise from increases in the USD gold price and/or decreases in their local currency exchange rate.

The graphs below demonstrate potential exchange rate risks for non US investors in precious metals, using the Australian dollar as an example. They show The Perth Mint's average daily AUD gold price and the London Fix morning USD gold price since 1975 and the AUD/USD exchange rate since 1992.

The period from mid-2003 through to mid-2005 is a good example of exchange rate risk. During that period the USD gold price rose while the AUD gold price was flat.

The graphs above do not take into account any fees associated with an investment in precious metals. They are historical trends only and are not necessarily indicative of the future performance. The value of investments can go up and down and past performance is not necessarily indicative of future performance.

World Events

World events such as terrorism, war, political and economic trends, can all have an impact on the market price of precious metal as well as local currency exchange rates and hence the market value of precious metal.

The US dollar gold price can fluctuate significantly in response to investor sentiment, industrial demand, mine supply, central bank policies, and other factors outside the control of The Perth Mint.

Local currency exchange rates are also volatile. They can fluctuate in response to changes in a country's economic environment, political climate, stock market performance, interest rates, and other events and factors outside the control of The Perth Mint.

Investors interested in further information on the above data should visit the investment section of the Mint's website at www.perthmint.com.au where the Mint's extensive historical records of precious metal spot prices, exchange rates, London Fix prices and interest rates may be accessed free of charge.

Risk of Non-performance by The Perth Mint

The Perth Mint undertakes a number of obligations to PMCP clients in this PIS and PMCP agreement and it is possible that The Perth Mint may fail to execute its obligations. However, as the liabilities of The Perth Mint, including its obligations under the PMCP agreement, are guaranteed by the Government of Western Australia under the *Gold Corporation Act 1987*, any such failure by The Perth Mint means that clients ultimately have an exposure to the Government of Western Australia.

The State's AAA credit rating as at the date of this PIS may change from time to time in response to changes in its economic performance. Any such change in the State's credit rating may affect the perceived strength of Government Guarantee mentioned above.

Risk of Changes in PMCP Fees

PMCP fees will vary over the life of your investment because storage, insurance and other management costs will change. The Perth Mint may increase PMCP fees in subsequent periods if the costs associated with the operation of PMCP increase. The Perth Mint will give PMCP clients one month's written notification of any change in PMCP fees.

5 OPERATING PROCEDURES

The cost of purchasing precious metal is composed of:

Precious Metal Value: The precious metal value is calculated by: (total fine ounces purchased) x (sell metal price).

Fabrication Fee: If Allocated or Pool Allocated storage is chosen, a fabrication fee is payable on the applicable coin or bar product. Pool Allocated attracts a fabrication fee equivalent to 50% of the current applicable bar. Should a client choose to take physical delivery at any time, the balance will be payable, calculated on the current applicable bar premium at that time. Unallocated metal does not attract a fabrication fee. Where the fabrication premium is stated as a percentage, it is determined by the following formula: (precious metal value) x (fabrication percentage). Fabrication fees are not refundable.

Storage Fee: Refer to the Storage Options section for further information

Minimum Transaction: Please refer to the Fee and Product Information Schedule for further information

Clients can choose metal prices to be based on either (i) The Perth Mint's internationally competitive spot prices; or (ii) the London Fix.

In the case of allocated and pool allocated metal sales back to PMCP, PMCP only pays for the precious metal value and does not refund fabrication or paid storage costs. The precious metal value for sales back is calculated by: (total fine ounces sold) x (buy metal price)).

BUYING PROCEDURE

Procedures for buying may vary between Approved Dealers. Please contact your selected Dealer for further instruction. A Certificate will be issued upon completion of the transaction.

SELLING PROCEDURE

Procedures for selling may vary between Approved Dealers. Please contact your selected Dealer for further instruction. Your Certificate must be signed and returned to your Approved Dealer.

Please refer to your Approved Dealer for information regarding minimum transaction amounts.

DELIVERY PROCEDURE

The PMCP is able to facilitate the delivery of your allocated precious metal to most destinations around the world, or you can arrange to collect the metal from the PMCP offices in Perth, Western Australia. The PMCP itself is not a freight company and as such, will source freight information and pricing from specialist freight companies. It is important to remember that in utilising these services, you are bound by the terms and conditions of these companies.

Logistically, the shipment of precious metal cargo is not as simple as the freight of other goods due to its high value and specialist insurance requirements. Factors such as time and pricing can only be determined with detailed information and The Perth Mint is unable to offer price estimates.

The Perth Mint Depository facility is a storage program. Should you wish to purchase bullion bars or coins for immediate delivery, please contact our Bullion Sales division. All allocated and Pool Allocated bullion bars and coins purchased through Perth Mint Depository will attract storage fees on a quarterly basis.

If you would like to take delivery of your metal, please contact the PMCP office and provide the following information:

- SEC Number
- Name
- Delivery Address (deliveries can only be made to physical addresses, not PO box numbers)
- Contact telephone number (Note: Deliveries should only be made directly to the client. If you would like to organise delivery to another facility or person, additional information is required)
- Total ounces to be shipped.

Please Note:

- Under the PMCP agreement, The Perth Mint is obliged to have client's precious metals ready for shipment or collection within two days (for allocated) or ten days (for Unallocated or Pool Allocated). Please note that depending on the complexity of your freighting requirements, it may take long than the two or ten days for The Perth Mint (or yourself, if you are organising your own delivery) to obtain freight quotes and make arrangements for delivery. The PMCP team will make every effort to have your metal dispatched as quickly as possible however delays may be experienced due to flight schedules and other freighting delays outside The Perth Mint's control and/or stock availability and production schedules if you are requesting non-standard coins or bars.
- Due to the complexity inherent in the delivery process, clients must confirm their requests in writing or by email.
- All outstanding invoices, including freight, storage and packing must be paid before the metal can be dispatched or collected.
- Certificates must be signed and returned before metal can be dispatched or collected.
- Clients organising their own delivery must make an appointment for collection.

AUDITING YOUR HOLDING

Allocated precious metal holders may inspect or collect their deposits at The Perth Mint subject to satisfactory personal identification and account verification. It is essential to make an appointment to view allocated metal.

Alternatively, a third party nominated by you will be permitted to audit your deposit on presentation of an acceptable instruction from you to the PMCP Depository Services Manager.

For Unallocated or Pool Allocated holders, the fact that there is no specific bar or coin recorded against individual clients and the metal backing their account is pooled, it is not possible for a client to audit these types of holdings. Pool Allocated and Unallocated investors rely on the Mint's audited Annual Reports, which are signed off by the Auditor General of Western Australia that they comply with the *Financial Management Act 2006* and the *Gold Corporation Act 1987*. The reports are available online at http://www.perthmint.com.au/about_us_the_perth_mint_annual_reports.aspx

In addition, Pool Allocated investors will be able to view bar listings online at <http://www.perthmint.com.au/investment.aspx>

STORAGE OPTIONS

Precious metals can be stored in the PMCP in the following ways:

- Allocated – The Perth Mint acts as bailee, storing specific coins and/or bars in the Mint's storage facilities. Clients pay the quoted precious metal value, fabrication fee and initial storage fee at the time of purchase. Ongoing storage fees are charged.
- Pool Allocated – The Perth Mint acts as bailee storing physical precious metals that the Client shall own as an undivided interest as an owner in common along with other clients participating in the same pool of Pool Allocated. Such metal shall not be available for the Mint to use. Clients pay the quoted precious metal value and initial storage fee at the time of purchase. Ongoing storage fees are charged.
- Unallocated – Clients own, as an owner in common with other Unallocated clients, an undivided interest in Gold Corporation's pool of precious metal maintained in unsegregated storage on a fungible basis without specific identification of the Client's Unallocated precious metal. The Perth Mint may use that metal in its operations, subject to the terms and conditions of PMCP. Clients pay only the quoted metal value at the time of purchase. No storage fees are payable on this option.

The availability of the three storage options for each precious metal is subject to change. Please see the Fee and Product Information Schedule for availability as well as Allocated and Pool Allocated storage fees.

Clients can convert between any one of the three storage methods at any time. In the case of Unallocated metal or Pool Allocated metal, clients wishing to take delivery must first request that their precious metal be converted to Allocated. In such cases fabrication costs are payable at the time of conversion and are based on precious metal market prices at the time of the conversion. Storage charges (which include the cost of insurance) operate as follows:

- Storage fees to be charged quarterly in advance.
- Storage fees will be invoiced 6 monthly in arrears on 30 June and 31 December.
- Based on London fix price at the beginning of each quarter.
- When a client buys metal, storage will be charged from the value date to end of the quarter using the London fix price at the beginning of the quarter.
- When a client sells metal, storage will be refunded from the value date of the trade to end of the quarter using the London fix price at the beginning of the quarter.
- When a client buys or sells at the end of a quarter for value into the next quarter, the price used will be the deal price not the London fix price.
- Clients that collect metal within three months from the date of purchase will incur a three month storage charge.
- If a client is withdrawing all funds from an account which has no metal left in it, then amounts due from as yet unbilled storage fees or overdue storage fees or deals will be deducted from any payments due to the client.
- All storage fees are inclusive of 10% Goods and Services Tax.

PRODUCTS AVAILABLE

The Fee and Product Information Schedule lists the various forms in which allocated metal can be purchased. All products listed meet the definition of precious metal in section 195-1 of the Good and Services Tax Act and currently does not attract a 10% Good and Services Tax.
